SUMMARY

AI & Generative AI Engineer with extensive enterprise software development experience and hands-on expertise in Python, LangGraph, LangChain, FastAPI, and .NET Core APIs. Builds knowledge assistants using RAG and single-agent workflows that connect conversational interfaces with HR and service-management systems through MCP tools and enterprise APIs. Strong foundation in backend development, databases, and cloud integration.

CORE SKILLS

GenAI & Agentic AI: LLM Application Development, RAG, Prompt Engineering, Embeddings, Semantic Search, Tool Calling, Agentic Workflows, Model Context Protocol (MCP), LangChain, LangGraph

Backend & APIs: Python, FastAPI, C#, .NET Core, ASP.NET Web API, REST APIs

Cloud: Microsoft Azure (Azure OpenAI, Azure AI Search, Azure AI Foundry, App Service, Functions, Blob Storage)

Databases & Vector Search: PostgreSQL, pgvector, Microsoft SQL Server, Azure SQL, Cosmos DB, MySQL, MongoDB

Frontend: React, Angular; AI-assisted Frontend Development

PROFESSIONAL EXPERIENCE

Application Development Team Lead | TELUS International, Noida Feb 2022 - Oct 2026

- Develop enterprise AI applications combining Generative AI, knowledge retrieval, and API-driven business automation.
- Build Python, FastAPI, and .NET Core backend services integrating AI workflows with enterprise systems; contribute as a hands-on individual contributor to pharmacy application modernization.

Assistant Manager, Software Development | Teleperformance, Gurugram May 2019 - Feb 2022

- Worked as a hands-on individual contributor developing ASP.NET MVC and .NET APIs, SQL Server components, and MyHiring HRMS enhancements for onboarding, candidate registration, and employee information workflows.

Software Developer | Simplex Control Equipments Co., Dehradun Jan 2018 - Apr 2019

- Developed C# and ASP.NET MVC industrial automation applications integrating PLC/SCADA and IoT sensor data, with real-time monitoring, threshold alerts, and SQL Server reporting.

Software Developer | Himja Software, Dehradun May 2014 - Jan 2018

- Developed ASP.NET MVC, C#, and SQL Server business applications; built responsive interfaces using JavaScript, jQuery, and Bootstrap, and maintained existing modules.

SELECTED PROJECTS

GenAI Knowledge Assistant with Agentic Workflows

- Developed a single-agent enterprise assistant using LangGraph and LangChain, with intent recognition, conversation context management, and tool selection for knowledge queries and business actions.
- Integrated RAG for enterprise knowledge and HR policy answers with supporting references. Integrated enterprise APIs for ticket creation and ticket-status retrieval.
- Collected and validated required details for business actions and presented ticket progress, assignment, and updates through conversational responses.

Technologies: Python, LangGraph, LangChain, FastAPI, Azure OpenAI, Azure AI Search, Azure SQL Server.

Pharmacy Management Software - Modernization

- Worked as a hands-on individual contributor developing and enhancing pharmacy modules as part of the modernization team. The application supports prescriptions, patient and prescriber records, clinical safety checks, inventory, billing, and healthcare-system integrations.

Technologies: .NET Core, Microsoft SQL Server, Pascal, Delphi.

MyHiring HRMS Project

- Developed candidate registration, bulk uploads, and electronic onboarding for hiring vendors; integrated Vue.js frontend workflows with Consultant Hiring backend APIs and EDF/PDF editing with MyHiring Core APIs.
- Integrated third-party APIs and resolved production defects; supported security and code-quality checks using WAPT, HCL AppScan, and SonarQube.

Technologies: ASP.NET MVC, ASP.NET Core, Microsoft SQL Server.

EDUCATION

Bachelor of Computer Applications (BCA) | Uttaranchal Institute of Management, Dehradun

2008 - 2011
